IBM Keyboard & Microsoft Mouse

The DTD-140 series Thin Client delivers top performance for your most demanding applications. Based on Industry leading NeoWare technology, you can experience PC-like performance when running local applications such as Windows Media Player®, and Internet Explorer®, and Java®. With Neoware e140, Neoware is the global thin client provider which offers DVI (Digital Video Interface) support on a stand-alone thin client. DVI displays brighter and truer colors in sharper images for a superior visual experience.

### UPGRADEABLE

Neoware e140 is designed to have the longest desktop life possible. It is upgradeable and expandable to meet your changing needs as your company grows. You can easily upgrade flash and/or RAM, or migrate from one operating system to another, even future versions of today's operating systems. That's why Neoware e140 can help eliminate worry about the future. Will your current desktop solution be able to keep up with your future needs? The All in One Thin Clients are our most powerful workstation, integrated with Neoware technology, offering digital video interface and application performance comparable to others. With both DVI and DB-15 monitor ports, you are guaranteed the best display possible on any monitor. Our thin clients come with Windows XP Embedded (XPe) which offers the most current thin client connectivity to Windows, mainframes, and feature-rich Web applications with the security you need. Our secure features include:

- DB9 PS/2 Keyboard Port
- DB9 PS/2 Mouse Port
- Parallel Port
- 2.0 USB Ports
- Network Activity Indicators
- Fast Ethernet Fiber Interface (100 Mbps)
- Gigabit Fiber Interface (1000 Mbps)

### Networking

- 100MB SC Fiber Ethernet
- 1000MB SC Fiber Ethernet
- Rear Panel Fiber Indicators for Link & Activity

Warranty is One Year Parts and Labor
