

Dual Xeon All-in-One Computer/Server DTD-DX-17 Ultra-High Performance and Convenience

The DTD-DX-17 is a complete computing or Server solution using the latest Dual Core processing technology from Intel. The All-in-One design provides convenience for high performance requirements at the desktop, and convenience for mobile computing requirements with fewer components to transport. It features a built in 17" display, Dual 10/100 Mb Ethernet interfaces, 24X CD ROM drive, and removable hard drive. The DTD-DX-17 includes support for multiple operating systems, third-party add-in cards, memory modules, and expansion capabilities for up to 24 GB of memory. Operating system options include Microsoft Windows Server 2003 Enterprise Edition, Microsoft Windows 2000 Advanced Server, Red Hat Linux Enterprise, SUSE LINUX Enterprise Server, and Novell NetWare.

KEY FEATURES

Processor:

Dual 64-Bit Intel® Xeon - 3.0 GHz

Main Memory:

8 GB standard
 (expandable to 24GB)

I/O Ports:

- (1) Serial - optional
- (3) USB
- (1) PS2 Keyboard
- (1) PS2 Mouse
- (1) Intel® 82541PI GB Ethernet*
- (1) Marvell Yukon -EC 88E8050 GB Ethernet*
 *supporting teaming and failover,
 10/100/1000BASE-T, RJ45 output

Video Display:

17" TFT

Graphics Chipset:

Integrated ATI* RAGE* XL SVGA video controller

Removable Hard Drive Options:

- 300GB standard
- 400GB & 500GB - optional

Drive Bay Options:

- DVD ROM Drive
 - CD-RW ROM Drive
 - CD-RW/DVD ROM Combo Drive
 - DVD ROM Drive
 - Iomega 250MB Zip Drive

Other Options:

- Additional Serial Ports
- Fiber Optic Interface
- Touch Screen Control
- External SATA Disk Drives
- Carry Handle

Power:

- 110 – 260 VAC 50 – 410Hz

Dimensions:

13.5"W x 12.5"D x 2.3"H

Weight:

35lbs.
